EDUCATION

London School of Economics
(LSE)

BSc. Economics

SKILLS

AI

- AI workshops & strategy
- Agent & harness design
- AI workflow automation
- Agent assisted tool-building
- Codex, Claude Code, n8n, Cursor

Operator

- Salesforce, Jira Admin
- SQL
- BI (Looker, Tableau, Databricks)
- Advanced Excel modelling

PROFILE

Chief of Staff and AI enablement leader, leading AI strategy and transformation at Aspire (600 FTE, YC18, Series C). Running technical workshops, building curriculum, shipping agents and internal tooling that drive our org towards being AI-native. Technical builder capable of architecting and building skills, agents, AI tools and automations (bottoms-up). Simultaneously leading company AI strategy with our leadership team (top-down). Have worked with C-Suite level stakeholders for 7+ years.

Aspire

SINGAPORE

AI ENABLEMENT LEAD & CHIEF OF STAFF

NOV 2024 - PRESENT

- **Leading AI enablement & adoption across Aspire.** Built and run the AI Champions program, a curriculum and technical workshop series taking ~30 embedded operators across 10 functions from 'first prompt to first agent'. Champions now ship their own tools and agents; the next phase makes function leads accountable for AI roadmaps and KPIs.
- **AI solutioning and building: including agents, skills, workflows and custom tools**, ensuring responsible-AI guardrails – human-in-the-loop review, access controls. Please view the [AI Solutions Portfolio](#) section below for selected projects.
- **Running AI workshops internally across all levels (including C-Suite).** Includes hosting a 3-hour session at the company leadership offsite for 40+ senior executives. Spoke about AI strategy on creating an AI-native org, along with hands-on building. Running internal workshops (including a 1-day hackathon for the Product team), and 1-1 coaching. Over 100 individuals trained.
- **Initiated and shaped Aspire's background-agents initiative.** Initiated the technical vision (introduced harness-engineering principles), inspired by Stripe's Minions and OpenAI's Feb 2026 paper. Serving as lead thought-partner to the engineer leading the initiative. Our first background agents are live, autonomously creating PRs for Sentry issues and bug tickets.
- **Right hand to the Co-founder/CTO** as Chief of Staff across a 600+ FTE company spanning 10 tribes: quarterly planning, roadmap, leadership reviews, and exec-level decision materials.
- **Led launch of Aspire Premium**, the company's first subscription tier, exceeded active-account targets by 10%. **Designed and shipped Launchpad**, a Jira-based product governance system, now adopted company-wide (inspired by Revolut's NIAP process).

AI SOLUTIONS PORTFOLIO

- **Support Ticket Agent.** 18 CX agents manually triaged 250-350 tickets/month with inconsistent results. Proposed AI solution to VP of CX, working with team to understand existing process. Built AI agent with n8n that auto-triages, routes and data-enriches every CX ticket using Jira, Hubspot, Slack MCPs and webhooks. Successfully cut misrouted tickets from 48% to 17% in two months, saving ~SGD\$100k/year in engineering bandwidth.
- **Engineering Performance Platform.** Created a performance metrics framework for CTO, then used AI to build an enterprise-grade analytics platform, complete with AI-generated executive reporting. Platform is now adopted as source-of-truth by engineering leadership (used daily by CTO, 11 engineering managers, 12 product leads). The visibility provided resulted in 50% reduction in average open bugs after 2 months.
- **Voice of Customer Agent.** Solutioned across ops, product, data and sales teams to build an AI agent who collects customer signals across different entry points and platforms, synthesise them into themes, and file product backlog tickets directly in Jira. Delivers 6-8 themed insights a week to all tribe leaders and PMs in Slack.
- **Aspire-vibecode-starterpack.** Built a Claude Code plugin letting non-technical staff scaffold and deploy apps. '/vibe-initiate' interviews the user and sets up repo, scaffold, the Aspire design system and SSO; '/vibe-deploy' ensures the right Github and Vercel permissions, and one-shots a production deploy via Vercel CLI.
- **Aspire Learn Platform (in alpha).** Commissioned by and solutioning with COO to build Aspire Learn, an internal e-learning platform to replace a SGD 70k/year vendor (in progress). Building custom MCP to allow admins to create new courses directly using Claude Code/Codex agents.
- **Aspire-specs-writer.** PMs frequently wrote product specs misaligned to engineering requirements. Worked with engineering team to encode spec requirements and best practices into a '/specs-writer' skill, which automatically runs every time PMs write specs using an AI agent. Acts as a forcing function to guarantee engineering-ready specs.

AI SPEAKING ENGAGEMENTS & THOUGHT LEADERSHIP

Speaker and facilitator across a full spectrum of AI fluency: hands-on building workshops (first prompt to first agent) for internal operators and public audiences, through to C-suite strategy sessions on building an AI-native organisation. Recent engagements have reached 300+ at the Anthropic Claude Code Meetup and 1,000+ (est) at Singtel.

- **'Autonomous Agents: Building Agent Factories'** — Anthropic Claude Code Meetup #6, 27 April 2026. Spoke to over 300 attendees on autonomous agents, and how we are building them at Aspire. [Link](#)
- **'How to Build an AI Chief of Staff'** — AI Learning Labs, 21 May 2026. Ran external workshop with founders and operators on how to build an AI Chief of Staff. Walked through basics from connectors, skills to building first AI automation. Most attendees successfully built a basic AI agent by the end. All reviews received were rated 5/5. [Link](#)
- **'How to Harness Our Company'** — Aspire Leadership Offsite, 03 June 2026. Hosted 3-hour workshop for Aspire's leadership team (including C-suite) framing our AI strategy, followed by hands-on workshops which covered building AI skills and automations live. A result of this workshop was our VP of Marketing drafted a skill framework for his entire team, who are now working on actually building skills.
- **'The Secret to Building an AI-Native Team'** — Singtel AI Talk, 12 June 2026. Invited by Singtel to be on their panel discussion on how to build AI native teams at an enterprise level. Expected to have over 1,000+ people attending in-person and online.
- **'The AI-First Enterprise Blueprint'** — Building the Modern Growth Stack, 16 June 2026. Speaking on a panel discussion together with Sleekflow and SecondTalent, aimed at Hong Kong based founders.
- **'Practical AI Applications for Startups'** — Osome AI event, 25 June 2026. Invited by Osome to speak together with their CPO Tamas Gogge on a panel on the topic of building an AI strategy and culture at a company level.

OTHER WORK EXPERIENCE

Aument Capital

SINGAPORE

HEAD OF STRATEGY & OPERATIONS

JUNE 2023 - NOV 2024

Aument Capital is a digital wealth startup with US\$200M+ of assets under management.

- **Worked directly with CEO to build our tech stack from 0→1.** Owned enterprise partner relationships end-to-end — ran technical architecture discussions and live solution walkthroughs with developer and executive stakeholders. White-labelled the platform to UAE partners, and expanded the relationship into a 9-figure partnership.

Entrepreneur First

SINGAPORE

FOUNDER-IN-RESIDENCE

SEP 2022 - DEC 2022

SG12 cohort (Europe's premier accelerator), backed by Reid Hoffman and the Collison brothers.

- **Selected from 1,000+ applicants;** acted as CEO running market research, customer interviews and strategy.

Beacon

LONDON

STRATEGY & ANALYTICS MANAGER

JUL 2021 - SEP 2022

Series B SaaS startup, backed by Jeff Bezos, Eric Schmidt and Marc Benioff.

- **Worked closely with Ops Teams and VP of Lending to build the reporting infrastructure from 0→1** (including a proprietary CRM tool, along GCP SQL models, Looker dashboards) and defined 30+ KPIs used by leadership.

Monzo

LONDON

TREASURY STRATEGY & INVESTMENTS

DEC 2019 - JUL 2021

Unicorn fintech bank, backed by Google Ventures and last valued at \$5.9bn.

- **Built and launched Monzo's Treasury Investment Portfolio from 0→1,** scaling assets from £0 to £500M in under 12 months, owning strategy and operating model end-to-end.
- **Led build of in-house trading platform as technical product owner,** bridging engineering and business from specification through production deployment.

HSBC Global Markets

LONDON

TREASURY TRADING & ANALYTICS

MAR 2018 - DEC 2019

- **Traded FX, rates, bonds and loans** for the bank's balance-sheet management, and built a Bloomberg-fed analytics dashboard that surfaced a new data-driven trading opportunity.
